General Comment

What's the point of working if Ai is going to control?

What's the point of trying to be more if something is automated and dished out without imagining.

Cheap knockoffs of copy's running the world.

Are we not supposed teach about what is true.

I am trapped by an ai in my work place. I cannot change how to interact with clients due to having to follow a particular set of instructions and time.

Humanity is supposed to be something, raw, new and kind of messy; if it's a copy, the ai will make everything feel disconnected. A world generated algorithms. A false narrative of idea.

The world feeds off the living.

I have become depressed in my job.

I am losing hope in the American dream, that's fading away every year as I go on.

I have dreams of writing and art. I do hard manual labor, pay my taxes and I live every day for a better tomorrow. Hoping for a day I don't have to stress or struggle.

I may not be a college graduate or a degree in scholarly advancement. But I know feelings and see pain in the eyes of people every single day.

This is when a lie and truth finally blur? The Ai.

No one will know who is, who was, or who will be.

I don't want to be part of the emptiness machine.

I don't want to live in that world.

I can't.

I won't.

(We the willing
led by the unknowing
are doing the impossible
for the ungrateful,
we have done so
much for so long,
with so little,
we have become qualified
to do anything with nothing... -anonymous)
