Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2959

Comment on FR Doc # 2025-02305

Submitter Information

Name: Andrew Saier

General Comment

I strongly oppose giving AI companies the right to ignore copyright and suck up and regurgitate information without any limitations. These companies need to be regulated and forced to pay for their theft, and if they feel they cannot survive without wholesale theft of information then they do not deserve to survive. I do not believe AI holds a place in the future of the US infrastructure since it cannot create on its own and is vastly overhyped for its capabilities and future prospects. It has been far oversold to the American public by people who are just trying to fleece people before their industry collapses. We've seen entire industries flailing because executives think AI can replace humans, and it simply cannot. Moreover as a creative person AI steals from artists and creators violating our copyrights and creative energies. AI seeks to remove the soul from civilization and creative endeavors, and it must be restricted.
