General Comment

Open Ai (and all other generative AI technology) cannot exist without theft of Intellectual property. If people want to train AI using their own work then so be it, but Open Ai (and all other generative ai technology today) currently train their models based on the work of other human beings without their permission. While I fully support the furthering of technology and growth as a society moving towards the future, I do not believe giving these people a pass on crime against other humans is a good idea. Our copyright laws are pretty clear and have been protected for ages for a reason. Please do not let these money hungry men steal from and starve more artists.
