General Comment

AI is a major threat to the American economy as it steals jobs away from human workers. Each time a new generative AI model is released, unemployment spikes. Encouraging it's development is an attack against the people, and allowing it to use copyrighted works undermines the very purpose of copyright in every way since the better the AI gets, the easier it will be for anyone to ask for a direct transcript of it's training material.

For now all it can do is plagiarize, but if this continues it can and will be used to outright pirate it's sources. I strongly oppose this bill by every account.
