

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-rv46-hvk4
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3007

Comment on FR Doc # 2025-02305

Submitter Information

Name: Andrew Olson

General Comment

AI can be used for good, but copyrighted materials, IPs and creative works must be protected at all costs. AI Generated Art/Music and other creative works are built upon models of stolen work. People spend a lifetime mastering their trade only for those at the wheel of AI models to steal their talent and call it their own. AI could be used to benefit communities and peoples lives but the current implementation across the board fails to account for the Human element. Nothing created today in terms of AI Art is an original piece of work. The people behind "AI Art" would have you believe that because they were able to spin up a service to produce this "AI Art" that they are now the owners of what it produces, however how can that be true if it was essentially stolen goods? It's cheating. You wouldn't let someone cheat on a test right in front of you and give them a passing grade would you? This is that. This is cheating, it's theft and a lack of actual hard work to become an "artist". Protect artist. Reject AI as it is now. All it does is drain resources and consumes electricity that could be better spent elsewhere. AI as it is now, is harming the world. It is harming America.
