Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3010

Comment on FR Doc # 2025-02305

Submitter Information

Name: Austin P.

General Comment

Shielding AI companies from liability due to their theft of content from the open Internet is definitely the wrong move here. In no other industry can you actively (nor legally) steal copyrighted material to essentially resell to people. AI companies need to be held financially accountable for all of their theft over the past few years, and if this means the death of Generative AI as we know it, then so be it. If your industry requires theft to stay afloat, your industry should not exist.

Generative AI has produced nothing of value in the several years that it has been in development, and it does not look like it will start doing so any time soon. In essence you have a chat bot that often spews misinformation and outright makes up sources to statements it "hallucinates." The investment money that AI companies have been receiving could be better spent elsewhere on things that actually have benefits.
