Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3018

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kenneth Burrus

Address:

General Comment

Artificial intelligence, especially in the creative endeavors has an ideal of being used for saving labor, bringing talent to smaller projects, and enhancing the efforts of those already skilled at various crafts.

In actuality, the effects of AI often leads to REPLACING the skilled workers, both stealing their efforts and taking their job prospects. While automating manual labor is often a helpful task to reduce injury and strain, in creative works it serves less of purpose other than to optimize humans out of a uniquely human activity something most who do it ENJOY the time put into doing it.

I want AI to do my laundry and dishes so that I can do art and writing, not for AI to do my art and writing so that I can do my laundry and dishes. - Joanna Maciejewska
