General Comment

AI as it is currently being peddled by technocrats is a flawed and broken technology. It cannot properly respond to queries without providing broken and in some cases dangerous nonsense. The use of it to generate artistic works requires training on copyrighted materials, making it outright theft. Software users overwhelmingly despise this technology and DO NOT want it polluting any resources that we use. The government SHOULD NOT use this technology for analysis or predictive purposes as the results are inaccurate, unreliable, and untrustworthy.
