Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3032

Comment on FR Doc # 2025-02305

Submitter Information

Name: Daigo Fukuda

Address:

General Comment

I am severely against giving AI any legal power whatsoever at this present time. Of course creative livelihoods will be at stake with the replacement of such an immoral tool, but with that replacement there will be nothing left for the AI to steal from.

People should work with what AI is capable of now instead of being replaced by the tool itself. All AI can do is take from what already exists, and without the copyright boundary, human creation will be killed. In turn, AI will also quickly stagnate with no creatives to feed off of, and will ruin the tool itself.

We are barely figuring out a way to co-exist with AI right now, so giving anymore rights to AI right now is a terrible move and idea.
