As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-s24g-hon4
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3033

Comment on FR Doc # 2025-02305

Submitter Information

Name: Rhonen Williams

General Comment

The term 'AI' as it applies to this technology, is a total misnomer, meant to invoke sci-fi ideas that the technology does NOT represent. 'AI' can not invent anything, it can only steal from the work of talented individuals so that others may unfairly profit off of them. 'AI' cannot understand concept as a human can, it can only understand static and patterns. It does not work like a human brain in any way, it is a calculator.

For these reasons, it CANNOT be in a position to make decisions on anything, as it can only create guess based on stolen information, without understanding that information. The amount of money that has been flooded into this technology that only stands to make life for everyone worse is disgusting, and the idea of it being used or tolerated in such capacity by the government is deeply disgusting. Even for things many consider 'unimportant' like art or media, this only serves to remove the humanity from such things, and turn it into pointless slop.

The only purpose 'AI' holds is to make a few people rich off the back of investors who don't know any better. No matter how much money goes into it's development, it will forever be a scam, and anyone not at the top of these 'AI' developing companies will suffer for it.
