General Comment

Allowing AI to train on content that isn't there is another way of stealing someone's creation. Which is Robbing and putting 2 and 2 together is illegal. It should be able to do this since the creators are against there creations being stolen from others. Consent is needed and should be applied. Plus, AI has no right to take art from others. Not only it just edits the original because of its programming, but it also shows that person use AI on the original isn't even a real artist. They just let an computer do the work for them. Which as well all know is lazy.
