General Comment

I believe that no AI company should be free from the consequences of copyright infringement. Generative AI doesn't progress for the better not will it better humanity.

I believe if a company wants to run their model off of scanning art and studying art they should be required to license it. Or buy it outright. Otherwise all we would be allowing is a legal form of theft, both in craft and intellectual property.

Defend humanity, defend our artists, defend our ability to create.

Hold openAI accountable for what they have been doing. Stealing.
