General Comment

This plan is an active threat to all artists and creators out there. AI can only steal ideas from vulnerable creators and studios and having it go unchecked will result in mass plagiarism as AI scalps people's hard work, costing more money and resources to make than hiring a human creator would, all for a unpassable final product that no one will like. Humans want art made by humans, and AI cannot provide that ever no matter how it is trained. It is dangerous, it should not be used, and should be forbidden tech in private or public use.
