Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3096
Comment on FR Doc # 2025-02305

Submitter Information

Name: Alex Smith

General Comment

Generative AI not only robs recent grads in STEAM of their future, left in endless debt without a way to repay, but it actively disincentivizes original research and art development by ensuring there is no reward for hard work. AI cannot create original ideas, so the US will stagnate without new information and the rewards that come with public participation. It further creates a divide that leaves well-developed professionals with no legitimate outlet for their work, both creating legitimate ire in the population and ensuring that new work is inaccurate full of hallucinated info, bad code, and unsellable art.

Furthermore, AI cannot be held accountable for decisions, therefore it should never be allowed to make decisions that could harm others with its judgements made by hallucinating information, building in biases from its programming such as large amounts of junk data, and possible future malice.
