General Comment

There is no reason to give this much power to AI or the companies that profit off this. All this will lead to is more slop, disinformation and stupidity for the American people to consume. Not to mention that AI is sucking our planet dry of resources so that we can make such slop and disinformation. There are countless articles and scholars that can explain all this. If AI is truly the future then why does it need access to copyrighted materials to do anything? Shouldn't it be smart enough to train off copyright free materials and learn from there? This also begs the question of what does copyright mean anymore? If we can feed AI copyrighted materials, what is stopping someone from training it off specific copyrighted materials (such as a specific person's work) and then generating materials very similar to the original?

Don't do this.
