General Comment

This proposal is definitely a bad idea. Overall, OpenAI generates results based on information the program finds. Therefore, the program is taking ideas and visuals from other individuals. This fact will cause issues in regard to copyright issues on the corporate level and on the individual level. Additionally, AI programs, such as OpenAI, are known to provide inaccurate information. This fact will be harmful to people trying to uncover accurate information. Overall, I urge the members of our government to vet and against OpenAI.
