General Comment

AI needs to be abandoned. It is harmful in all fields. AI has no place in our world, let alone the United States. AI has no right to use copyrighted works of any kind to enhance or train it's model. It cannot be given free reign, it will spell the end of all art forms as we know it. You will legalizing IP theft in addition to a bunch of other kinds. It will be taking power of out the hands of the talented millions who have been creating our favorite works for years. It takes away my livelihood as an artist.

AI is not the answer to any of the problems the US or the World has. AI is not going to help anything when it comes to "National Security" that is Trump, Elon Musk and his cronies (OpenAI in this case) trying to further dismantle the United States for whichever Foreign Nation has them in their pocket. OpenAI fully knows it can't enhance it's model unless this passed. We cannot allow that to happen. AI is harmful to the world not only in what it produces but also in how much energy it consumes to order to create said abominations. This executive order, like all the executive orders that have been signed since January are all harmful to the United States. It will never be helpful, it only seeks to harm us more, lower our world standing and further make us a laughingstock to our enemies and allies. Those behind OpenAI cannot even explain they need to ability to do this or why AI is helpful to mankind for the purposes of their 'business' They only want profit they don't care who suffers in the pursuit of that. This will also put a stop to bigger companies like Google and Microsoft from enacting the same practices.

AI needs to be impeded and stifled. It needs to be kept under harsh restrictions. It cannot be allowed to go public. Trump does not care about making this country stronger. He has stripped it of it's most necessary and needed sectors all under the guise to get a better budget for the army and funding war crimes. This was NEVER about making America better. There are no "right policies" for this or anything else he's done. The US doesn't need to be a world leader in AI. We've not been a world leader in any regard since this man took office. This is not to make our future bright, it is to bring us into ruin quicker so we can be taken over by foreign adversaries or destroyed completely.

DO NOT LET THIS PASS. WE NEED TO STOP LETTING THINGS LIKE THIS GO THROUGH WITH NO OPPOSITION. For too long has this current party gotten away with far too much. Congress, both the Senate and House are utterly useless. Its now up to the people to try and right the ever-growing list of wrongs that have been committed since January 2025.

If you care at all about the United States and it's potential future as a nation. You will not let this go through. Resistance has to begin somewhere. Do not hand these people another win. Speak! Let your voice be heard!
