As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-sud7-81ab
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3160

Comment on FR Doc # 2025-02305

Submitter Information

Name: Michael

Roark

General Comment

Speaking on my own behalf, I do not think AI has a place in government, or the future of the U.S. in general. AI has been hyped up by numerous technology leaders for over a decade now, and there have been no real results to show. There has been little value to AI despite all of the resources sunk into it.

Numerous times I have seen google AI give blatantly wrong answers at the top of a google search when the result gives a correct answer instead.

This is also not to mention the ability of AIs to deceive. Numerous articles like:

<https://www.sciencealert.com/ai-has-already-become-a-master-of-lies-and-deception-scientists-warn>

<https://c3.unu.edu/blog/the-rise-of-the-deceptive-machines-when-ai-learns-to-lie>

Have already shown that AIs have shown a capability or willingness to deceive. This is a dangerous development and could be disastrous under the wrong circumstances.

AI also gets so much of its data from copyrighted resources. SO many times there have been times where AI has been trained on copyrighted work, effectively stealing the work of others to produce a worse product. The technology of AI relies on that theft to produce its results. AI only threatens the livelihoods of the American people.
