General Comment

AI as a shortcut is fundamentally theft. AI does not create, it does not dream and build like that of a human. It coldly, calculatedly steals directly from real creators and real people. It's designed to mimic and fool, not to actually create something new.

Removing all legal protections against AI theft is not only grossly irresponsible, it opens up the flood gates to so many other problems for consumers and employs alike. Jobs will be lost while companies cut jobs from their staff using AI to steal work from actually working, paid individuals.

As a tool, it has its place in helping existing creators, but as a replacement, it is theft. Do not protect thieves, protect us from the thieves.
