

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-t2a2-wrkv
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3184

Comment on FR Doc # 2025-02305

Submitter Information

Name: Amanda G

General Comment

This CANNOT come to pass. This would harm so many people, artists, people who enjoy art and creations, and more. Google, and these other big corporations such as it, are more than capable of actually hiring and paying someone to illustrate and/or come up with their own new creative ideas instead of stealing and robbing individuals who they did not pay or hire or give any sort of compensation for. Companies supporting generative AI need to stop trying to build their product upon theft especially if they are wanting it to be the "future". This is stomping on the bodies off hundreds of thousands and millions of citizens who bring art and creation, HUMAN CREATIONS, to life and bring enjoyment in this world while trying to get enough personal revenue just to afford their next meal. Most products that you use today had to be invented by a real human, and they sure were not invented by some slopy software that turns REAL creativity into generated recycled Frankensteined slop. Just hire staff to do this work as it costs much less than the power grid needed to run this shady software and hardware nightmare.
