General Comment

No Chance in HELL anybody's art, speech, video, or Anything of the sort can just be Taken and then used without permission, especially in such a wildly uncreditable form, to the detriment of artists who would happily accept payment to do the work any AI Model would do.

Generative AI has a massive materials and copyright cost. If the companies producing LLM/other generative models can't afford those costs, they are not viable as a service. The government has no good reason to cowtow to random Techbros spinning cost cutting based in fraud and theft as "Innovation".

Let People Sue Open AI. They're not exempt from copyright law.
