General Comment

AI dominance is a scam. The whole thing is just tech billionaires trying to reap a return on investment. The technology is furthering the destruction of the environment, taking away jobs, and furthering the divides that have been only widening between the rich and the poor and between races.

As it stands there is next to nothing being done to truly regulate this technology and time and time again articles come out about how copyright protections being enforced effectively kill the tech. THAT should be a clear sign of what its built on.

Those at the top, very clearly, don't care because if they have their way they get to pocket even more money by laying off more people.

There's no jobs being created by this in an environment where people are ALREADY losing their jobs at the whim of the people at the top.

While AI may "just be a tool" it is currently a tool in the hands of the wealthy, the hands of the authoritarians, the hands of the bigots. A tool that in those hands will actively destroy rather than build up not only this country but the rest of the world.
