General Comment

I do not believe AI has any benefit to the future of America, it is full of failures, theft, disgusting abuse of ethics and morals, a huge strain on resources, and at the end point still needs human intervention and correction.

It has shown to be incorrect and inconclusive in several very simple and very vital areas, such as mathematics, which we already have basic and rudimentary mechanics for.

It has been used to abuse the workforce, eliminate employment, and blatantly steal from hard working creative minds. It's an absolute insult to the world of art, the realm of technology, and an actual threat to human imagination and health.

Discard it entirely, and immediately.
