

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-te88-mly9
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3238
Comment on FR Doc # 2025-02305

Submitter Information

Name: Tony C
Address:

General Comment

As an artist, I am very much against the development of generative AI technology as it is actively stealing from my livelihood. It is of utmost importance that people who create for a living still have that ability to do so and not be undercut by a technology that will not deliver results as intended. While AI may have a place in the automation of repetitive tasks, generative AI has no place in a world where human creativity far outshines anything that can be generated by a prompt. From a consumer's perspective, AI being shoehorned into any technology is a major turn-off and not what anyone asked for, especially if the results often end up in hallucinations or completely false information. Please reconsider funding this push for generative AI technology, it is not something that we asked for, nor is it a feature that I personally feel is useful in any way.
