

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-tg7q-npxu
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3246
Comment on FR Doc # 2025-02305

Submitter Information

Name: Jack J

General Comment

Whatever benefits a sweeping exemption from the copyright system for AI development companies would grant the US as a whole, it will be dwarfed by the sheer amount of money they will make via exploitation of the work of others. Private companies privately developing private products for sale on the open market should not be made "more equal than others" simply because they're willing to sell their product to the government. This is akin to giving Ford complete immunity to patent infringement lawsuits just because they say it's necessary to give the US Army better trucks than the Russian Military. And if this does go through, it will only spur on the development of tools designed to salt artwork and text files with junk to poison AI datasets, which will then have to spend even more money working around them unless the government makes it illegal to draw or write things AI doesn't like.

So yeah, this isn't a good idea.
