General Comment

AI is a bubble and will not be nearly as technologically important in day to day life for the public. In 10 years we will see ai used for specialized tasks in specialized jobs that humans cannot do. Giving ai companies free use of copyright just means more power and water draw right now for no overall gain in the long term. When the bubble pops this law will mean nothing in the interim. Protect the rights of the proper owners instead of those who want to take and will give nothing in return.
