

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-tk1o-x919
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3259

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kea Zertuche

General Comment

As a creative person and someone who cares about the welfare of those with careers in creative industries, it is absolutely abhorrent that the government is even considering making it legal for corporations to train their AI on creative material that is outside the realm of open license. This is a thinly veiled attempt to cut corners and use AI to turn a profit, plain and simple. Not only is it a blatant violation of intellectual property and copyright law, it's a violation of moral and ethical practices in creative industries where human creation IS the backbone of the industry. Generative AI is plagiarism wrapped in the guise of "innovation." Trump and the Republican administration are being paid out by corporations with billions of dollars in revenue to throw at this issue so that they can get their hands on ideas and materials without having to spend any of that money at the creators who came up with them. They are asking to make theft legal. I implore you, please see sense and listen to the industry leaders who have and continue to provide evidence that allowing AI companies unmitigated access to people's intellectual property is a terrible idea and will lead many industries to a complete collapse and result in real economic and individual devastation.
