Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3298

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sarah Yager

General Comment

As a concept artist and illustrator who now has to compete with generative AI that is trained without consent on many creative individuals' work, I strongly oppose the theft of our copyrighted material by Google and OpenAI.

It is impossible to support "human flourishing, economic competitiveness, and national security" without protecting the individuals who make human flourishing possible (i.e. real people, not algorithms).

It is impossible to protect "economic competitiveness" by destroying the rights of all artists to appropriate their creative work.

There is no "national security" if the people who produce the wealth of our culture are not protected from the predatory actions of Google and OpenAI.

You must choose to protect each individual creative artist against the theft of their work by corporations whose sole purpose is the centralized control of human endeavor in order to maximize their own bottom line. The profits of corporations like Google and OpenAI means the annihilation of what is critical to our human survival- the protected free expression of individual thought and action.
