General Comment

AI has no place in the future of America. It only functions on the stolen work of our citizens and endangers our jobs in a time where the job market is already unstable. It uses energy and resources that could go to better this country. On top of that, with the digital age misinformation with AI is already rampant on social media. If this technology becomes better, it will become easier for Chinese and Russian propaganda to infiltrate American society. It has already been used to defame my neighbors and countrymen with deepfakes. There is little profit or good use to be had with generative AI except for making the next generations lazier and lazier. AI is a profitless hole that I pray the government doesn't continue dumping our hard earned tax dollars into.
