Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3310

Comment on FR Doc # 2025-02305

Submitter Information

Name: Robert Brooks

General Comment

Over the past several years, the tech industry as a whole has proven willing to con and abuse people across the world again and again. From crypto rug pulls to NFTs to the much older act of gutting services in the name of making them appear more profitable in the months leading up to a sale, they have shown themselves to be entirely untrustworthy with the level of power and control they currently wield.

AI is merely the latest of a long string of technologies that fail to deliver on their promises, or fail to serve any purpose at all. The idea that we would not only allow them to continue on their current course, but empower them by gutting the protections of people's intellectual property, is unconscionable.
