As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-tvkw-81nt
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3313

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

Having a specific company and or a specific company model with an exemption from the federal government allowing for intellectual property theft sets forth a dangerous precedent. And let's not mince words, using copyright works without compensation for creators of said work is theft. These learning models have already been caught stealing works protected by copyright, and now are seeking essentially a pardon and the legal right to do so after the fact. I've made neural networking models for both work and in my graduate program, and know first hand these "AI models" can do no creation of their own, they need to be fed data and work pioneered by others. Therefore whoever has their work used, should be fairly compensated, as is the spirit of copyright protections. You cannot have selective copyright enforcement, you cannot have a chosen class allowed to steal. It is outside the spirit of the law.
