

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-txwp-anfu
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3323
Comment on FR Doc # 2025-02305

Submitter Information

Name: Whitney Falba

General Comment

Automated assembly and basic, repetitive ideas are things computers can do. Taking away jobs that require actual critical thinking and intelligence, and replacing them with machine learning that lacks the context and depth to perform will kill people.

People will die, and resources will be spent to try and prove how "good" AI is while people die.

Do not do this, unless you are making a plan to prevent machine intelligence from eventually taking over our entire society.

If we only valued people for output - like a computer might - we would have no Mozart.
