

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-tzfi-lls7
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3327
Comment on FR Doc # 2025-02305

Submitter Information

Name: Wyatt Shipp

General Comment

If the usage of A.I. is to be normalized in the professional and personal lives of American people, then these programs must be integrated through measures that do not detract from the ability for working-class citizens, professionals, artists, and creators to support themselves through their line of work. Employees of the creative industries face consistently increasing challenges in their efforts to pursue livelihoods in their fields, especially for independent artists whose projects and creations directly influence the ability for A.I. to gather data and learn its technological functions. The rapid development of A.I. threatens the intellectual integrity of living, breathing human artists, destabilizing their ability to retain rightful legal control over their original creations. To avoid worsening socioeconomic conditions for creative workforces, our government must implement supportive measures to ensure that these negatively affected citizens can still obtain adequate employment in their chosen field, that they can retain creative agency over their intellectual property, and that they can receive fair, livable wages through their creative work in order to support their basic survival and sufficiency. Our country, our world, and our species as a whole thrives on its ability to create meaningful, inspiring, and original art that can last through generations, granting us an inalienable ability to tell stories and share messages with each other that have the power to open our minds, hearts, and spirits to experiences and perspectives we may never have known otherwise. The future of human creativity rests in your governance.
