General Comment

Ai, as it exists now is made off of stolen data. Every single person who had their artwork stolen to be put in an Ai database should be properly compensated or the database should be empty. If the technology cant survive without theft it shouldn't survive. Ai is also destroying the environment with data farms, it takes enough energy to power a city when people use just a few prompts. Its also been used to have people's identity violated by using revenge porn with innocent people and children's faces. Ai harms the environment, artists, and children who are victims of revenge porn. Ai technology is being used for porn of children being used as a bullying tool. Children are committing suicide from the bulling from Ai deem fakes . Ai needs to be heavily regulated but preferably stopped completely. The environment and people's lives are at risk.
