

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-u53g-rf4c
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3354

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eric Skyer

General Comment

Can't tell if my first comment got saved (because the means to view other comments on this site is, frankly, unintuitive and feels broken that multiple keywords yielded no comments at all), but I'll leave another again: generative AI like that which OpenAI and its founder, Sam Altman, espouse, have no place in America's future; far from it; they leech off of other options for America's future growth and steal a future away from countless creatives by exploiting their work for corporate gain.

Public domain & copyright have a complicated relationship, but there's nothing "complicated" about what Altman's desires. OpenAI sees copyright as an obstacle, an impediment to their ability to steal whatever media they want to replicate through a machine, devaluing not only the creative process but the hundreds of thousands of artists, musicians, filmmakers, actors & others who create the pillars OpenAI stands on through their theft. They lie to the American public about a potential it has not lived up to, overhype their results and demand more resources than they ever give back to people through their systems, and they have no right to ask for MORE when the results they've gotten from AI thus far barely justify what they've already (non-consensually) stolen to use it. America does not need intelligence like OpenAI to become great, it never did, and it never WILL.
