General Comment

I do not support using AI since the data it is trained upon is stolen from hard working human beings. Some of whom rely on creating art for a living.

It does not create new or even derivative works based on the data, it garbles up the original and spits out subpar content. It is a waste of computational energy and a waste of money.

This is nothing more than grasping by AI companies in an attempt to remove copyright protections so they can steal wholesale with no repercussions. If they are allowed to do so, piracy may as well be made completely legal.
