Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3370

Comment on FR Doc # 2025-02305

Submitter Information

Name: Nicholas Eckert

General Comment

The only action plan regarding artificial intelligence I could support is a plan to enforce patent, trademark, and copyright law with regard to the collection and obfuscation of collection of creations from human creators for the purpose of giving artificial intelligence patterns to make flimsy facsimiles.

Better search algorithms from search AI is one thing. What is being developed, generative AI, starts out as a flagrant violation of copyright, wastes excessive energy and money, doesn't come close to the product developed by actual people, and all this in an attempt to avoid paying those actual people for their talents. The people in charge of generative AI are attempting larceny and fraud. They should be taken to court, charged and sued, and their assets used to fund art from people.
