As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-ucvr-uztw
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3380

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eon Pierce

General Comment

I am a theoretical physicist, and during my PhD program I studied and contributed to the mathematical foundations that power today's cutting edge AI models. I oppose this plan because, contrary to its wording, it benefits the companies developing these systems rather than the national security interest. The United States already has multiple agencies who could develop world-leading cutting-edge AI systems for the benefit of national security under public authority and oversight, and who would be able to do it without needing the policy goals described by this plan because they are public entities not acting for profit. There is no need for for profit-motivated private companies, who by definition do not act in the interests of the American public or national security, to be given this special treatment. Said companies advocate for this special treatment only because they are unable to compete without government assistance and wish to avoid being held accountable for their brazen and uncompensated theft of work made by Americans which they stole, not because they care in the slightest about American security, but only so that they might profit as much as they could from the labor of others. This order is nothing more than a transparent attempt to circumvent laws that protect the American people and their work from corporate exploitation, cloaked in the misleading falsehood that the companies concerned have any interest but their own in mind. It does not serve the purpose it claims to, runs counter to the interest of the American public, and the United States does not need this policy in order to remain competitive on the world stage anyway.
