General Comment

This "burdensome" government regulation was clear copyright protection for creatives, academia, and other parties from having their efforts stolen and reused without permission. This large scale language models do nothing more steal the work from these parties and then reproduce a "close enough" approximation. And the fact that ethical treatment of those who actual produce the work that these models train of of is considered burdensome should be given pause and thought. I am 100% against the removal of these protection.
