General Comment

Our top priority should be diverting resources from the AI boondoggle to some other purposes that will actually provide for the material needs of Americans. Perhaps much needed physical infrastructure, or improving access to healthcare. Or maybe just distributing rubber bouncy balls to young ruffians. Just about any use of our government's time and taxpayer dollars would be better.

There's no use to giving social maladroitness coastal elite tech bros unfettered access to the copyrighted works of genuine American artists, artisans, scientists, and innovators, just so they can waste energy, literal electric energy mind you, training a machine that is wrong 60% of the time.

China beat us to the punch with Deep seek, let's just agree to take the L, move on, and do something better with our time.
