

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Tracking No. m8a-uljd-75hs
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3416
Comment on FR Doc # 2025-02305

Submitter Information

Name: Sabrina Espinoza

General Comment

I believe that retaining copyright protections upon publicly-posted art and information is not only vital to the rights of their creators and researchers, but that to remove them would be a blatant violation of both free speech and damage to the spirit of creative integrity. There is a word for making use of something without paying for the rightful use of it to the original creators. Piracy. Throughout the history of the world, creators have fought tooth and nail to be able to retain the use of their creative property and not risk it being stolen from them to be used by another who will neither credit nor pay fairly for the use of what has been used of theirs by others. It would be like renting a car and then not paying for either it or the gas which the owner will have to replenish themselves. Copyright laws exist in the United States to protect creators. And allowing OpenAI and other generative AI creators to stomp all over copyright laws is an insult to everyone who has ever put effort into creating something. Allowing OpenAI to have free access to steal and make use of what others have created is not a matter of national security as they seem to claim. It is blatant theft and piracy and should not be sanctioned by the government or any other ruling body. OpenAI and other generative AI has proven repeatedly that it is a bottomless resources sink and nothing put into it has turned up anything of true value, and in fact has caused numerous counts of misinformation in a time when misinformation is a major point of concern in the country. Do not allow OpenAI or any generative AI program to have unfettered power to utilize anything they see fit. Do not protect them as they steal the hard work and information of others, especially as these technologies have shown how much harm they've done in such a short amount of time as they've been around.
