General Comment

We have already seen that these companies, if given the ability to simply run away with no regulation or focus or plan, will simply burn money. Giving these companies blatant, unrestricted access to steal from artists and other American businesses, violating their copyrights which are enshrined in the Constitution, won't lead to better products. Chinese competitors have shown more innovation while operating under tighter restraints with less advanced technology.

If a company needs all the money in the world and free access to every copyrighted work ever created in order to make a product, that doesn't sound like a very smart or efficient company. That sounds like someone creating excuses because they can't deliver.

Do not allow these companies to trample our constitutional rights. Constraints breed creativity- Something these companies clearly and sorely need.
