General Comment

By allowing OpenAI (or any AI generative programs/models) to completely bypass copyright laws, you are not only infringing on the rights of ALL copyright holders and creators, you are opening the floodgates to allow anyone to both use and abuse any material for any purpose. This will cause any and all copyrighted material to be stolen and repurposed, regardless of if it's a freelancer's creation or the mascot of a major corporation.

This will also cause a creative stagnation, which will in turn backfire on generative programs, which requires material to scrape and repurpose. This is effectively "shooting yourself in the foot".
