Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3464

Comment on FR Doc # 2025-02305

Submitter Information

Name: Elizabeth Bross

Email: [REDACTED]

General Comment

I do not believe AI holds a place in the future of the US. In fact, I believe generative AI is a major threat to national security and needs to be outlawed altogether, for multiple reasons.

AI steals from my livelihood as an American and profits off of theft. AI technology uses vast amounts of energy resources that will be even more devastating to the planet if it is allowed to continue. AI contributes to the spread of misinformation and has the potential to be used to falsify evidence. In extreme cases, AI opens the potential for sexual predators to commit acts such as "removing" the clothes off a picture of someone, leading to an increase in AI-generated child pornography and revenge porn and creating extremely dangerous situations, not to mention intense mental harm to those affected.

I strongly encourage the government to not let OpenAI use copyrighted material to train their AI, and instead consider enacting laws to prohibit the use of generative AI before it becomes an even bigger threat to national security.
