General Comment

Revoking EO 14110 was a mistake. Private sector AI developers are NOT being "hampered by unnecessary regulation". These companies are already running a scam, promising radical and unbelievable innovations when in reality their "product" is no more advanced an algorithm than what Youtube uses to suggest videos. Not to mention the very existence of said "product" requires insane amounts of energy, water, and the wanton scraping of anything and everything on the net.

This "Action Plan" is horribly ill-advised at best, and at worst it is a blatantly nepotistic attempt to enrich these companies. Do NOT implement it.
