General Comment

Allowing tech companies to hide behind "fair use" in training on copyrighted works without permission or compensation is both a tragedy for art and culture in America, as well as a complete misunderstanding of how Generative AI works. LLMs and Diffusion Models CANNOT create unique new works of art, they can only regurgitate and plaigerize. As the world is flooded with more AI generated content the value of all human-made content will approach zero, which means an end to art and creative writing as a way to make a living, and a much more boring and depressing world. Please don't allow inhumane tech companies to destroy our cultural past, present and future.
