As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-v9nx-gngm
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3525

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

Enhancing America's "AI dominance" will not be possible without devaluing our entire human population. American culture, art, tourism-- this is all dependent on the passionate contributions of the American people. None of this can be meaningfully replaced by algorithms. It will be disastrous for our nation's artists and creators to allow AI companies to run amok without legal consequences for taking from their work. Holding AI to a separate standard than human beings in regards to copyright law is unjust and unwise. What precedent does this set? What other laws and standards will AI not have to abide by, while the American people suffer the consequences? Our government is here for one thing: the people. Devaluing the livelihoods of hundreds of thousands of artists within our own country will ruin careers. It will ruin lives. To what end? Do not turn a blind eye to the people of this country as they beg not to be tossed aside by their own elected officials for the sake of soulless, purposeless, digital waste. Please do not forget the well-documented effect the so called "AI industry" has had on our environment. We have made so much progress in the last few decades to reverse the effects of climate change. AI could undo that progress in only a fraction of the time. If we must move forward with AI development, a legal division must be established between AI development for art and AI development for tools, industry, military, etc.
