General Comment

I, as a citizen of the United States of America, do not believe that AI holds any place in the future of the USA. AI is simply a trend that is rapidly dying out as people come to terms with the long term environmental effects that the host servers have. As an artist, AI is also steals from my livelihood, taking away potential jobs and undermining the work that I have trained to do for many years. Again, I do not believe that AI hold any place in our future.
