Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3531

Comment on FR Doc # 2025-02305

Submitter Information

Name: Isabelle Mccarthy

General Comment

Nobody should have the right to take someone else's hard work for themselves without paying for compensation. Artists who work primarily in online spaces are unable to defend themselves already from petty thieves and others passing their work off as their own; yet now with the rise of AI generated images people are able to have their work stolen in massive data scrapes, where every image, ever moment of work an artist, writer, singer, or actor puts into their work can be copied and used without their permission or giving them compensation.

Supporting acts like this is a horrible and immoral practice, with the future of our society defined by how we react to and use new tools. This ethical failing of representatives to defend the most simple of civil rights, ownership of one's own work, is a slap in the face to all of us who have worked hard to create unique and distinctly American art. AI generated images are not art, they are math used to predict things that should look nice, but the data is not provided willingly.

If you vote to allow this through, then you are no better than a common thief stealing from those who would starve for the pride they feel in their work.
