General Comment

This plan to bring data scrapers together and train them off of the hardworking American people is a bit despicable. This "AI" business is not true artificial intelligence, but a mimicking monstrosity that learns by feeding upon the everyday man.

I urge the Whitehouse to seriously reconsider it's position to push this disruptive and invasive theft of the people's privacy. If this sounds wild, I would remind you that from the start generative AI and the chatGPT models have been thrown together by being fed the works, notes, and writings of people without their approval or even knowledge. It is disgraceful to this country that this AI bill would even be considered plausible.
